Don't forget to practice your times tables too.

Challenge 1

By the end of Year 3, you should try to know the 2, 3, 4, 5, 8 and 10 times tables off by heart.

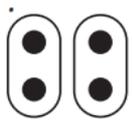

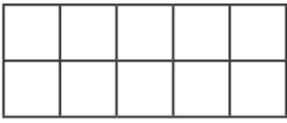

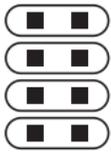

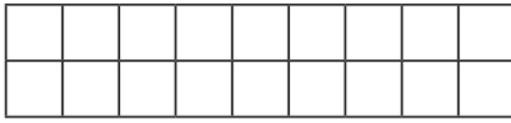

This week in Maths, we have been looking at multiplication facts for the 2, 5 and 10 times tables.

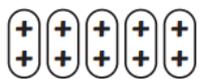

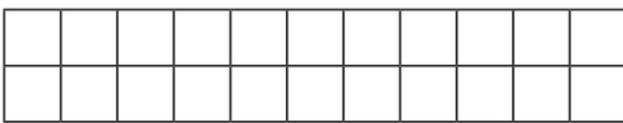

Arrays are pictures that help us see numbers. Number sentences are shown with dots and arranged into rows and columns.

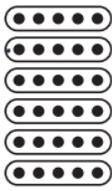

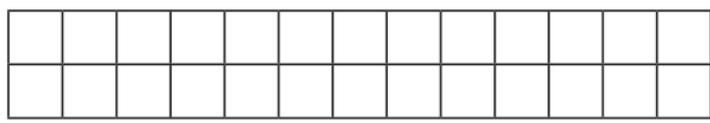

Here is an example:

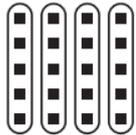

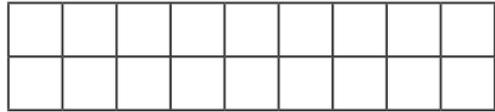

● ● ●	3	+	3	=	6
● ● ●	2	×	3	=	6

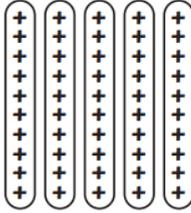

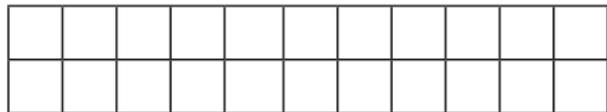

Can you write the multiplication sentence and repeated addition sentence for each array?

2×2			4×2		
--------------	--	--	--------------	--	---

5×2		
--------------	---	--

6×5		
--------------	---	--

4×5		
--------------	---	--

5×10		
---------------	---	--

Challenge 1:

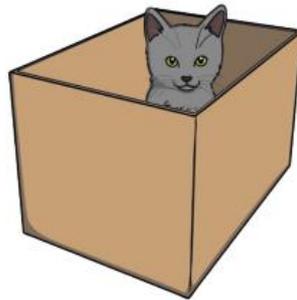

Read the text below and answer the questions using full sentences.

Amba's Birthday Surprise

10 Amba woke up a long time before the sun came
16 through her bedroom window that morning.
24 Today was her seventh birthday! She leapt out
33 of bed quickly and ran downstairs to the living
43 room. She could see pink balloons and a pile of
50 presents wrapped in paper. Mum came carefully
58 into the room holding a big, brown box.

67 "Why don't you open this one first?" she asked
70 with a smile.

80 Amba peered at the box. It had little holes cut
91 out of the top. She lifted the lid off slowly and
102 gave a gasp. Lying on a soft, cosy blanket was a
111 tiny, grey kitten. This was the best birthday ever!

Quick Questions:

Answer each question in full sentences in in your Home Learning book.

1. How old is Amba?
2. Find and copy a word which shows that Amba was surprised when she saw the kitten?
3. Why were there holes in the big, brown box?
4. What do you think Amba did next?

Challenge 2 Home Learning

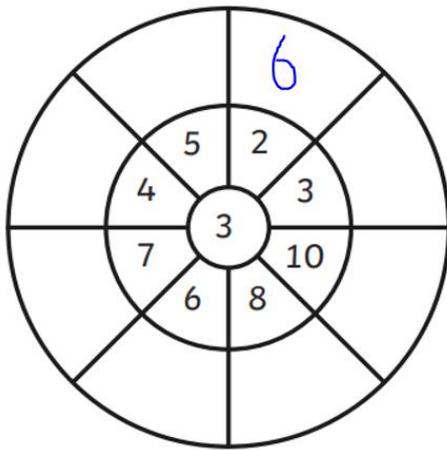

This week in Maths we have been looking at

multiplication and division facts for the 2, 5, 10 and 3 times tables.

Don't forget to practice your times tables too.

By the end of Year 3, you should try to know the 2, 3, 4, 5, 8 and 10 times tables off by heart.

Can you complete the multiplication wheel below for the 3 times table? You need to multiply the outer number by the centre number (3) so I multiplied $3 \times 2 = 6$.

Can you answer the multiplication and division facts for the 3 times tables?

Remember when we divide, we are sharing. We are asking e.g. how many 3's are in 6 or 21? Use your multiplication facts to help you.

$6 \div 3 =$	$30 \div 3 =$	$60 \div 3 =$	$4 \times 3 =$	$24 \div 3 =$
$12 \div 3 =$	$3 \times 3 =$	$21 \div 3 =$	$45 \div 3 =$	$99 \div 3 =$
$27 \div 3 =$	$36 \div 3 =$	$6 \times 3 =$	$7 \times 3 =$	$3 \div 3 =$
$42 \div 3 =$	$69 \div 3 =$	$15 \div 3 =$	$1 \times 3 =$	$66 \div 3 =$
$8 \times 3 =$	$11 \times 3 =$	$9 \times 3 =$	$45 \div 3 =$	$9 \div 3 =$

Challenge 2:

Read the text below which is all about the Stone Age periods. Can you answer the questions about the text?

Stone Age Time Periods

- 11 The pre-historic period known as the Stone Age, which is
22 said to have lasted for over three million years, was named
33 because of the stone tools and equipment used at the time.
43 The Stone Age is divided into three phases, although the
52 exact dates for each section vary across the world.
- 61 During the Old Stone Age, known as the Palaeolithic
70 era, the earliest relatives of humans, homo habilis, used
80 simple stone tools and Britain was still connected by land
86 to modern-day France and Denmark.
- 95 In the Mesolithic period (Middle Stone Age), the more
101 developed humans lived hunter-gatherer lifestyles,
112 constantly on the move in order to survive. At this point,
116 Britain became an island.
- 124 During the New Stone Age (Neolithic period), farming
132 began, pottery was developed and villages were built.

Quick Questions:

Answer each question in **full sentences** in in your Home Learning book.

1. Find and copy a phrase which means the same as 'Old Stone Age'.
2. In which place did Britain become an island?
3. Summarise the main points of this text in 20 words or less.
4. How are the Mesolithic and Neolithic periods different?
