

Year 2 - Lent 1

Science - Plant Survival

Habitat

Plants are living things and grow and change in different seasons. They also have different habitats.

Cacti grow in desert habitats.

Daisies grow in meadow habitats.

Parts of a plant

Growth

Some plants come from seeds such as cress and others come from bulbs such as daffodils.

Key words

sunlight

Plants need sunlight to make food. In shady places, plants grow slowly.

warmth

Plants need warmth to help them make food and grow quickly.

nutrients

Plants need nutrients to help them grow well and fight diseases. Nutrients are taken from the soil through the roots.

water

Plants take in water through their roots. The water carries nutrients around the plant.

air

Plants take in a gas from the air, called carbon dioxide, through their leaves. They need this gas to make food.
