

In maths we have been learning time and being able to tell the time for quarter past and quarter to. We have looked at ways to know if it is quarter past or quarter to. We have remembered that the minute hand points at 3 for quarter past and it points to 9 for quarter to. Please support your child in completing the questions below of writing the time of quarter past or quarter to and return by next Wednesday 4th February. If you have any questions regarding the homework please come see myself or Mrs Green.
