Portraits

A portrait is a painting, photo or drawing of a person.

Self-Portraits:

A self-portrait is a portrait that an artist produces of themselves.

Self-portrait,
Vincent van Gogh, 1889

Collages:

A collage is a picture that has been made from different materials.

Comparing portraits:

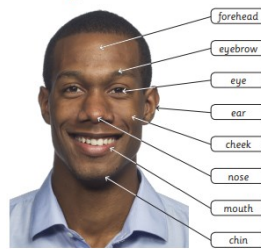

Portraits can be compared. The subject, colour, form, texture or composition of portraits can be similar or different.

The textures of these two portraits are similar but the colours are different.

Glossary

Collage: A picture made up of different, smaller parts.

Facial Feature: A part of the face, such as the nose, eye, mouth, ear or cheek.

Subject: The person, place or thing that is the main focus of the artwork.

Texture: The surface of a piece of artwork. Texture can be described using words like rough or smooth.
