Computing

Computer Uses

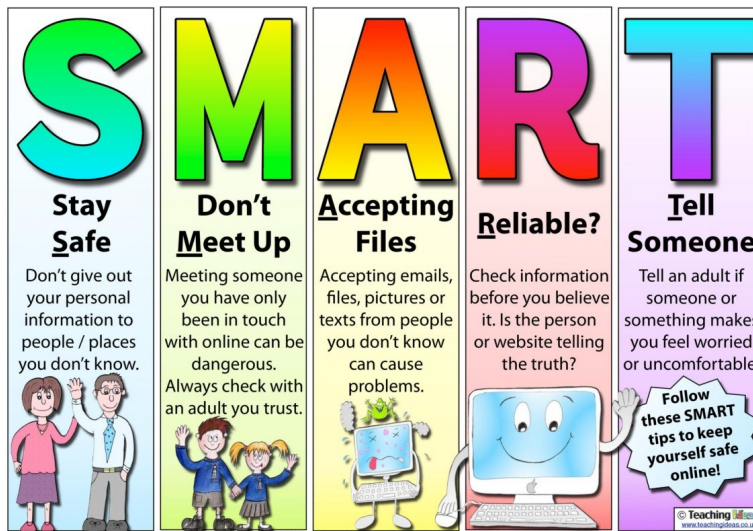

Computer use:

There are so many ways we can use a computer, both at home and in school.

Computers are also used in lots of ways in shops.

Rules for using computers:

Glossary

Barcode: A barcode is an image that uses lines of different thicknesses to represent information. It is designed to be read by a special scanner to input it to a computer in a quick way.

Computer: A computer is a device for working with information. The information can be numbers, words, pictures, movies, or sounds.

Keyboard: A device that allows a person to enter letters, numbers, and other symbols (these are called characters) into a computer.

Till: A place to store money in a shop.
