Scratch, Algorithms, Debugging and Using Data
Computing - Pentecost 1

Microsoft PowerPoint

A presentation programme used to share information in creative ways, using text, images and videos. Animations and slide transitions can make your slideshow interesting to watch.

Glossary

algorithm

a set of instructions, used to solve problems or perform tasks

debug

identify and remove errors from computer hardware or software

command

a directive to a computer program to perform a specific task

generalisation

a way of quickly solving new problems based on previous problems we have solved

programming

the act of translating the ideas of an algorithm into code that can be followed by a computer

Data Sharing

Data sharing is the process of making the same data resources available to multiple applications, users, or organisations.
